INTERAVIA

World Review of Aviation and Astronautics

Contents for year 1961

GENERAL SUBJECTS

No. 1 Short or Vertical Take-Off?
Review of European and American V/STOL Projects

No. 2 The New Jets Take Shape
Frankfurt/Main Airport
Aboard the *Clemenceau*

No. 3 Missile-Guided Strategy
TARAN System
Autonetics Story

No. 4 Paris-Orly Airport
Boats on Wings
T-38 Talon Supersonic Trainer

No. 5 Paris—Shop Window of the World's Aircraft Industries
Target and Reconnaissance Drones

No. 6 New Technical Horizons
Landing gears—Brakes—Tyres
World Radar Catalogue

No. 7 Highlights of the 24th Paris Salon
Small and Medium Turbine Powerplants
An Integrated Weapons System for VTOL Combat Aircraft

No. 8 Executive Aircraft
LFC—a New Method of Boundary Layer Control
The Super Broussard STOL Transport

No. 9 Outlook for the British Industry
Plastics in Rocketry
Undercarriages and Tyres

No. 10 The Supersonic Transport
World Air Transport Crisis
Farnborough Report

No. 11 The Heavy Helicopter
Tactical Missiles and their Guidance Systems

No. 12 Will Man Survive in Space?
New Frontiers
The U.S. Boosts Carrier Rockets

INDEX BY SUBJECTS

The first number after each title refers to the issue, the second number to the page

1. International Organizations

Freight Tariff War over the North Atlantic?: 4/425
The IATA Symposium of Supersonic Transport — C. H. Jackson: 6/773
IATA goes to Australia: Intro. Sir Hudson Fysh, K.B.E., D.F.C: 10/1366
List of IATA Member Companies: 10/1366
Skirmishes at Sydney — IATA's 17th AGM : 12/1707

2. Political

The New President Faces the Old Military Problems: 1/30
Tug-of-War over Skybolt: 2/146
Guided Weapons: Policy-Makers for Peace: 3/299
Coblenz — Nerve Centre of the European *Starfighter* Construction Programme: 5/553
Does the USAF Need the Mach 3 Bomber? — Colonel C. Tosti: 6/800
Keynotes: 7/927
Drama Without Sensation: 8/1075
Wall Street and the Berlin Crisis — Scott Hershey: 9/1180
Undecided Armaments Race?: 9/1197
Britain's Defence Policy — D. H. Wood: 9/1198
S/VTOL Aircraft for NATO: 10/1343
Does NATO Really Need the Single-seat VTOL Strike Aircraft?: 11/1486
The Four Cardinal Points: 11/1503
US Secret Service Counters Soviet Missile Threat : 12/1618
The Alternative Solution : 12/1635

3. Civil Aviation

Minimum-field Aircraft: 1/49
The New Jets and Their Demands: 2/163
The Decade Ahead: 2/164
Jets of Tomorrow: 2/167
What Makes an Airline Profitable? — R. W. Klabzuba: 2/191
Some Thoughts on Future Civil Transports and Their Safety Problems — D. M. Jameson: 2/202
US Bankers Speak of an Air Transport Crisis — Scott Hershey: 3/282
New Aspects of Air Freight: 5/645
In MEA's Maintenance Centre: 5/678
STOL Aircraft for Short-Haul Transports — H. Ziegler: 5/708
No Demand for US Airline Shares at Present — Scott Hershey: 6/776
More Seats, Fewer Passengers, Lower Fares: 7/908
Open Road for European Short-Haul Traffic — E. Skubinna: 8/1109
Round the World by TAI Jet — G. Février: 9/1288
The Price of Jet Transport: 10/1361
Air Transport Cannot Live by Mileage Alone: 10/1361
Australia's Overseas Airline: 10/1367
Jet Transport's Recurrent Problems: 11/1485
Civil Aviation in France: 11/1486
North to the Midnight Sun — M. Deskau : 12/1690

4. Service Aviation

Farewell to Runways: 1/47
Minimum-field Aircraft: 1/49
The Tactical Combat Aircraft: Towards Total Mobility — General L. M. Chassin: 1/54
Short or Vertical Take-Off and Landing? — G. Gabrielli: 1/75
European and American V/STOL Combat Aircraft: 1/76
Republic VTOL Projects: 1/82
The Helicopter as a Weapons System — F. L. von Doblhoff: 2/204

The French Navy Re-equips: 2/231
Soviet Show of Strength: 8/1109
The Red Army Presents Arms: 10/1424

5. Aircraft

a) Civil Aircraft

The Boeing 727: 1/29
The Convair 990: 2/176
Boeing Experience with Jet Airliners: 2/178
Production and Development of the *Caravelle* — L. Guista: 2/199
Good Market Prospects for Light and Business Aircraft: 5/554
SAAC. 23 *Execujet*: 5/676
North American *Sabreliner*: 5/702
Technical Data for the North American T-39: 5/703
Executive Aircraft for Every Purse: 8/1076
A Mixed Bag of Executive Aircraft: 8/1086
The 1121 *Jet Commander*: 8/1088
Saab's Small Jet for Airman and Business Man: 8/1090
The *Super-Broussard*: 8/1113
The Vickers VC.10 Production Line: 9/1202
The BAC *One-Eleven*: 9/1212
Business and Light Aircraft: The Way Ahead — P. Masefield: 9/1227
NAA Proposal for a Supersonic Transport: 10/1378
The Crane Helicopter — Dipl. Ing. Christoph Fischer: 11/1510
The Potez 840 : 12/1687

b) Military Aircraft

The Hawker P.1127: 1/77
The Short SC.1 and the Short PD.49: 1/78
Dassault VTOL *Mirage*: 1/78
The Bell D-188A: 1/80
VTOL Version of the F-104: 1/81
What Will Tomorrow's Tactical Transport Look Like?: 1/93
A New Approach to Flight Training (Northrop T-38) — A. W. Buck: 4/463
The Northrop T-38 Supersonic Trainer: 4/465
Flying the *Talon* — R. L. Sweeney: 4/469
The Lockheed C-141 Jet Transport: 5/647
North American *Sabreliner* : 5/702
The Technical Significance of the North American B-70 *Valkyrie* — Study Group: 6/803
Bristol T.188: 6/804
A STOL Reconnaissance Aircraft for Export: The Grumman *Mohawk*: 7/990
Spirale III — A Light STOL Military Transport: 7/1006
Saab's Small Jet for Airman and Business Man: 8/1090
Production of a Manned Interceptor: 9/1210
New Soviet Military Aircraft: 10/1434, 11/1520
The Crane Helicopter — Dipl. Ing. Christoph Fischer: 11/1510
The Westland *Wessex*: 11/1514
Canadair CL-41 and CL-41 R: 11/1518
Reinforcement for NATO — The Breguet *Atlantic*: 12/1684
The Lockheed *Hummingbird*, VTOL Army Liaison Aircraft : 12/1685

6. Guided Missiles, Rockets and Astronautics

Rockets, Missiles and Space Vehicles: 1/98, 2/221, 4/494, 5/707, 6/844, 7/1008, 9/1252, 10/1413
Strasbourg Proposals for European Space Research: 3/281
Guided Weapons: Policy-Makers for Peace: 3/299
Sentinels of Security (USAF Ballistic Missile Program) — Colonel C. Tosti: 3/301
The Cradle of a Giant (*Titan* Production): 3/304
Nike-Zeus: 3/307
The Mobilization Programme for a Thousand *Minuteman*: 3/308
Hound Dog — Fangs of a Deterrent Force — D. D. Meyers: 3/313
Missiles from A to Z: 3/319
Dyna-Soar — A Problem with Countless Unknowns: 3/321
Future of the *Polaris* IRBM: 3/327
The Small Deterrent: 3/331
The *Sergeant* Weapons System: 3/333
Tactical Rockets for the Atomic Battlefield: 3/351
The *Falcon* Family: 3/355
Radioplane Target Drones in Operation: 3/356
Round the World in... 108 Minutes: 5/556
Target and Reconnaissance Drones: 5/667
Man's First Journeys into Space: 6/794
The Soviet Space Programme: 6/795
Blue Water Surface-to-Surface Missile : 6/808
Space Research — An Investment in the Future: 6/815
Manufacture of Solid Rocket Cases at General Electric — R. H. Wettach: 6/824
Restrained Rocketry: 7/938
Pershing Rockets for Europe : 7/985
European Space Research Projects: 8/1058
Wag Tail: 8/1106
The *Bélier* Rocket Family : 8/1116
Seventeen Orbits Round the Earth in 25 Hours: 9/1179
The Vickers *Vigilant* — Lieut. Colonel H. Lacy M.B.E., B.Sc.: 9/1225
Plastics in Rocketry — Walter E. Field: 9/1269
No New Missiles on Show: 10/1396
Guidance Systems for Air-to-Air Missiles — T.W.J. Wong: 11/1525
Two Opposite Roles: 11/1529
Bullpup: 11/1530
Development of Guidance Equipment for the *Seaslug* Missile — J.M.C. Pinkham: 11/1533
The Bristol/Ferranti *Bloodhound* — D. J. Farrar: 11/1537
Trends in the Development of US Space Vehicles — O.H. Lange : 12/1636
The *Saturn* Rocket's Second Stage : 12/1644
Solid Propellants for Large Rockets : 12/1647
Two Space-age Excursions : 12/1656
Space Age Catalogue — III : 12/1661
Survival in Space : 12/1651
The Manned Lunar Project — Kurt H. Stehling : 12/1654
Keeping a Man Alive in Space — J. N. Waggoner : 12/1658
Food Supply in Space : 12/1659
MARS — Space Travel Simulator — R. C. Armstrong : 12/1683

7. Powerplants

Engine Considerations for VTOL Aircraft — A. A. Lombard: 1/60
Fan Engines for Vertical and Short Take-Off Aircraft — S. G. Hooker: 1/63
General Electric Lift Fans: 1/96
SNECMA Contributions to VTOL: 1/117
Rocket Motor Production for the *Tartar*: 6/806
Solid Rocket Propellants — Dr. K. Klager: 6/813
Models and Motors: 7/940
Rapid Advance of Small and Medium Turbo-Engines: 7/961
Small Turbines for Varied Markets: 7/966
The Low-power Turboprop — The Progress of the *Astazou* — J. Szydlowski: 7/970
The *Turmo III* Free Turbine: 7/973
Two Newcomers from Pratt & Whitney: 7/974
Conversion to Turboprops: 8/1092
Extending the Overhaul Life of Turbine Engines — A. G. Bowling: 9/1214
The Development of High Temperature Materials — E. R. Gadd: 9/1221
Supersonic Transport Propulsion: 10/1382
The Selection of a Supersonic Transport Powerplant — P. J. Ferrara: 10/1384
Supersonic Engine Problems — J. G. Keenan: 10/1387
Engines are the Mainstay (Farnborough) : 10/1394
Gas Turbine Propulsion Systems for Hydrofoil Craft — G. A. Hardgrove and C. Neesen : 10/1420
The Combined Turbojet/Ramjet for Supersonic Aircraft — C. Flamand: 11/1574
Solid Propellants for Large Rockets : 12/1647

8. Electronics

What's New in Electronics?: 1/112, 2/234, 3/371, 4/499, 5/680
Research and Production News: 6/849, 8/1125, 9/1272, 10/1426, 12/1702
A Common System for Radar Control of Civil and Military Air Traffic: 1/104
Atmospheric Phenomena Connected with the Jet Stream: W. Partl: 2/184
The Remote Transmission of Radar Information — H. Hart: 2/236

TARAN — A Compact Navigation and Fire Control System: 3/373
Analogue Computers in the Aircraft Industry — W. Giloi & E. Schoen: 3/376
USAF Troposcatter System to Link England to Africa: 3/383
Telecommunications with Satellites — J. Fagot: 3/384
Air Navigation and Traffic Control Aids — R. Aucouturier: 4/454
CSF Short-Range Radar: 4/456
Secondary Radar — D. H. R. Archer : 5/682
A New Approach to Reliability in Aircraft Radio — B. Infield: 5/699
The Ampex FR-100B Recorder-Reproducer: 5/701
Air Traffic Control is Not out of the Wood: 6/775
Primary Radar in Air Traffic Control — A. M. Patrick: 6/851
Telemobiloscope to Digital Radar: 6/854
European Radar Systems: 6/856
Problems of All-weather Automatic Landing — Dr. J. Goenner : 6/858
The Automatic Landing System of Bell Aerosystems Company: 6/859
Electronics at the Paris Air Show: 7/942
An Integrated Weapon System for VTOL Aircraft: 7/1001
A New North-Seeking Gyro Compass: 7/1007
The Digital Computer in Air Traffic Control: 7/1010
The Reduction of Air Collision Hazards: 7/1013
The Electronics of a Modern Interceptor: 8/1108
Doppler Navigation Systems for Helicopters: 8/1128
The ANALAC Radar Simulator and Analogue Computer: 8/1131
PEEP Eye-Level Flight Data: 9/1275
RACEP — A New Radio Telephone System: 9/1276
The AN/GSN-11 Automated Terminal Air Traffic Control System: F. C. Shadley and R. Meuleman: 9/1285
Air Traffic Control in the Supersonic Age: 10/1429
Guidance Systems for Air-to-Air Missiles — T. W. J. Wong: 11/1525
Development of Guidance Equipment for the *Seaslug* Missile — J. M. C. Pinkham M. A.: 11/1533
The SBAC Show in Retrospect: 11/1561
The DATICO Automatic Checkout System: 11/1566
BIRDIE: 11/1569
The Airborne Digital Computer DEXAN — C. J. Wayman : 12/1705

9. Non-Electronic Aircraft Equipment

Stabilization of VTO Aircraft — H. G. Conway: 1/65
What Should the Equipment of a VTOL Strike Aircraft Weigh? — L. Vercelli and R. Bignamini: 1/115
Liquid Oxygen Equipment for Aircraft Breathing Systems — S. Kugler B. Sc.: 9/1228
Equipment — Materials — Techniques: 11/1540, 12/1694
Undercarriage, Brakes and Tyres
Landing Gear Developments by Bendix: 6/837
Military Requirements and Undercarriage Design — R. Lucien: 6/839
Today's Undercarriage Design Problems — A. A. J. Willitt, D. C. Ae., A.F.R.Ae.S.: 9/1254
Modern Aircraft Tire Development — R. S. Randall: 9/1257

10. Airports and Airport Equipment

Frankfurt/Main, a Centre of Jet Operations — K. Prochazka: 2/215
Reflections on an Air Terminal — P. D. Cot: 4/443
Building Design at Orly — H. Vicariot: 4/446
Layout of the Central Zone (Orly) — J. Vasseur : 4/449
Electrical and Thermal Power Supply (Orly) — J. Block : 4/451
The New Terminal Installations at Work (Orly) — F. Didier : 4/452
Air Navigation and Traffic Control Aids (Orly) — R. Aucouturier : 4/454
CSF Short-Range Radar: 4/456
The New Hangar (Orly) — E. Becker : 4/458
The Pilots' View of Airport Lighting — G. R. Stroud: 8/1132

11. Research and Technical

Stabilization of VTO Aircraft — H. G. Conway: 1/65
Short or Vertical Take-Off and Landing? — G. Gabrielli: 1/75
The Short SC.1 and the Short PD.49: 1/78
Republic VTOL Projects: 1/82
Design Principles for High Subsonic Speed STOL Strike Aircraft — G. Ciampolini and F. Guira: 1/91
Pilot Reports on the X-15 — R. M. White and J. A. Walker: 1/101
Long-Range Jet Aircraft Cruise Performance — J. F. Renaudie: 2/187
Dyna-Soar — A Problem with Countless Unknowns: 3/321
The Future Hangs on Research: 5/609
DFS 581 High-Altitude Research Aircraft: 5/711
Techniques Galore: 6/793
Does the USAF Need the Mach 3 Bomber? — Colonel C. Tosti: 6/800
Semi-finished Materials in Light Metal for Aircraft Construction — Prof. Dr. Ing. P. Brenner: 6/819
Laminar Flow Control: 8/1101
Handley Page Projects: 8/1105
The Alvis *Stalwart* — D. H. Wood : 9/1231
The Supersonic Airliner: 10/1373
Supersonic Transport Propulsion: 10/1382
The Selection of a Supersonic Transport Powerplant — P. J. Ferrara: 10/1384
Supersonic Engine Problems — J. G. Keenan: 10/1387
Jet Transport Take-off — H. P. Frei: 10/1432
The Future of the Heavy Turbine Helicopter: 11/1504
I Fly the *Flex Wing* — L. Everett: 11/1520
Hydrofoils
Hydrofoil Craft of Today and Tomorrow — K. Büller: 4/479
The US Navy's Hydrofoil Projects — P. W. Nelson: 4/484
Boeing Develops a 100 Ton Submarine Killer — R. E. Bateman: 4/486
Grumman Hydrofoil Boats: 4/489
Lycoming Offers the Hydrophibian Concept: 4/490
Gas Turbine Propulsion Systems for Hydrofoil Craft — G. A. Hardgrove and C. Neesen: 10/1420

12. Industry

A Manufacturer's Assessment of Sales Prospects — E. F. Burton: 2/183
Autonetics — A Division of North American Becomes a Large Concern: 3/360
Coblenz — Nerve Centre of the European *Starfighter* Construction Programme: 5/553
ABC of the French Equipment Industry: 5/555
A Plethora of Programmes: 5/591
The New Tasks Ahead — General P. H. Gallois: 5/592
The French Industry's Programme — G. Février: 5/596
French Aviation Companies are Confident — K. Prochazka: 5/597
The American Industry's Bridgehead in Europe: 5/610
The Problem of European Industrial Cooperation — General F. Raffaelli: 5/618
European Shop-Windows: 5/619
Manufacturing for Mach 3: 6/822
Le Bourget in Retrospect: 7/929
The Outlook for the British Industry: 9/1199
Farnborough 1961: 10/1389
The Future of the Heavy Turbine Helicopter: 11/1504

13. Exhibitions and Congresses

Paris Air Salon 1961: 7/929-944
Farnborough 1961: 10/1389-1396
The SBAC Show in Retrospect: 11/1561
The International Trade Fair at Brno... and the Czechoslovakian Aviation Industry's Jubilee: 11/1572

14. Miscellaneous

Fifty Years of Aircraft Development (Vickers): 2/145
The Award of the E. E. Heiman Prize: 7/907

15. Index of tables

Missiles from A to Z: 3/319
French Aircraft from the 1959 to the 1963 Air Shows: 5/593
Target and Reconnaissance Drones: 5/671/2
European Radar Systems: 6/856
Characteristics of some Small and Medium Power Turbo-Engines: 7/964
Technical Data for Some Modern Executive Aircraft: 8/1083
Table of Heavy and Medium Turbine Helicopters: 11/1508

INDEX BY AUTHORS

Archer, D. H. R., M.A. — Secondary Radar: 5/682
Armstrong, R. C. — MARS — Space Travel Simulator : 12/1683
Arnolds, R. — The Digital Computer in Air Traffic Control: 7/1010
Aucouturier, R. — Air Navigation and Traffic Control Aids (Orly): 4/454

Barfield, N. A. — BAC *One-Eleven* : 9/1212
Bateman, R. — Boeing Develops a 100 Ton Submarine Killer: 4/486
